

Release Date: March 2026

Software Version: 2.8.11

Firmware Version: V24.05.04

Recommended Use

This release is recommended for all affected products listed below. It is important to keep your diagnostic tool current for optimum performance and to take advantage of all added enhancements. Please reference your user's manual on how to perform a software / firmware update on your diagnostic scan tool or code reader.

Affected Product(s)

- INNOVA® 7111 Smart Diagnostic System

New / Added Features & Functions

- **Added more PIDs in Live Data - Mode \$01:** Expanded the database to display the complete list of available PIDs supported by the vehicle's ECU. This ensures you have access to every data point to monitor performance and identify intermittent faults.
- **Added Vehicle Enhance Information - Mode \$09:** Allowed to view detailed vehicle identification and system-related information. It supported both All PIDs view and Vehicle Details, with dynamic parameters streamed like live data and static info (VIN, calibration IDs, etc.) retrieved on demand.
- **Volkswagen SFD - ECU Information Support:** Added a comprehensive vehicle list for SFD (Protection of Vehicle Diagnostics), allowing users to view ECU Information for the latest protected Volkswagen Group models.
- **Honda Body System Update:** Updated diagnostic rules for Honda Body Systems to ensure compatibility with the newest vehicle architecture.
- **Added EV/HEV/PHEV Inspection:** Introduced specialized PIDs to inspect for Electric (EV), Hybrid (HEV), and Plug-in Hybrid (PHEV) vehicles.
